Novus B50 Heavy Duty Stapler: Jam Proof Performance in a Modern Design

Peterborough, NH, January 9, 2017– Novus Dahle GmbH & Co., a world leader in staplers and punches, introduces the new Novus B50 Heavy Duty Stapler. Novus Staplers are the preferred choice among professionals throughout the world. These Heavy Duty clinchers are capable of continually stapling large quantities of paper with minimal effort. Designed and developed in Germany, they will exceed expectations and improve efficiency in the workplace.

The Novus B50 is German engineered and features an automatic bypass system that provides the convenience of using larger staples on smaller projects. A sliding adjustable depth guide allows you to set the staple location and ensure you hit the mark on every document.

The B50 also features an innovative Anti-Blocking System (ABS). This prevents the possibility of a jam and wrestling with your documents once they are stuck to the stapler. A dual staple guide further ensures trouble free performance by providing even pressure on the staple legs until they clinch your documents.

“The Novus B50 is an amazing heavy duty stapler,” said Christopher Jackson, Marketing Manager at Dahle North America, Inc. “it’s leverage and contoured handle make it easy to staple large stacks of paper.”

Dahle North America, Inc. is a fully integrated manufacturer of innovative office products and equipment with a brand name recognized for quality and precision. Dahle markets more than 300 products, including paper shredders, cutters and trimmers, scissors, pencil sharpeners, and Novus staplers.
