Dahle Enters New Era of Data Destruction: Offering Features Never Seen Before On A Shredder

Peterborough, NH, February 1, 2012 –

For over 80 years Dahle has continued to forge the future of office products and business machines - And again today, that legacy continues. Introducing the Professional Series shredders from Dahle. These machines are a dramatic accomplishment of innovative design, safety, and environmentally friendly features never seen before on a paper shredder.

Dahle is the World's only shredder equipped with the revolutionary SmartPower Energy Management System. This multi-stage system reduces power consumption after ten minutes of sitting idle (sleep mode), and completely powers down to a 0% energy draw after an additional 20 minutes of inactivity. This makes Dahle the most energy efficient shredder on the market. The benefits of Dahle SmartPower will appeal to those interested in conserving energy as well as reducing electrical costs.

Dahle shredders feature solid cutting cylinders milled from a block of German steel. They're perfectly aligned in an all-steel frame and guaranteed for life. The result is a machine with strength, power, and the ability to handle all of your document destruction needs.

“From production to operation, Dahle has always taken environmental concerns very seriously,” said Scott Prokop, VP, Dahle North America, Inc. “We are pleased to be able to offer such an environmentally friendly product.”

Dahle North America, Inc. is a fully integrated manufacturer of innovative office products and equipment with a brand name recognized for quality and precision. Dahle markets more than 300 products, including paper shredders, paper cutters and trimmers, scissors, pencil sharpeners, and Novus staplers.
