Dahle's High Security Shredders: Greater Security Risks Require Tougher Security Standards

Peterborough, NH, December 22, 2011 –

In these days of increased security concerns, the U.S. Department of Defense has implemented new security requirements for the destruction of Top Secret COMSEC documents. NSA/CSS Specification 02-01 sets a new standard for a shredder's maximum particle area, maximum particle dimensions, and for durability.

“World events have made us focus on our current level of security and increase it where we could,” said Scott Prokop, VP and General Manager, Dahle North America, Inc. “Our line of High Security Shredders will play a key role in destroying Top Secret information and preserving our National Security.”

Dahle High Security paper shredders are engineered to exceed NSA/CSS Specification 02-01 without compromise to operation or dependability. With five models to choose from, each shredder produces a 1mm x 4mm shred size and exceeds the standard set by Department of Defense. These shredders are perfect for military, Federal, State or local government agencies as well as Department of Defense contractors engaged in projects where National Security is an issue.

Energy conservation continues to be a top priority at Dahle. Dahle professional shredders are no exception. The World's only line of shredders with built-in SmartPower Energy Management System, Dahle Professional shredders operate using the intuitive SmartPower Energy Management System. This multi-stage system integrates “green technology” by reduces power consumption after ten minutes of sitting idle (sleep mode), and completely powers down to a 0% energy draw after an additional 20 minutes of inactivity. The SmartPower System will appeal to those interested in conserving energy as well as reducing electrical costs.

The easy-to-use command dial controls all of the machine's functions and notifies the user when to change the shred bag and if the door is ajar. This shredder offers fully electronic capabilities including such safety features as Automatic Shutoff when the cabinet door is open, and Auto Reverse to prevent an overfeed. It's these state-of-the-art features that save energy, time and provide a worry free environment.

Dahle North America, Inc. is a fully integrated manufacturer of innovative office products and equipment with a brand name recognized for quality and precision. Dahle markets more than 300 products, including paper shredders, paper cutters and trimmers, scissors, pencil sharpeners, and Novus staplers.
