

For Immediate Release

DAHLE INTRODUCES THE SHREDDER PERFORMANCE KIT:

Ensuring Optimal Performance of Your Precision Machine

Peterborough, NH, January 1, 2009 –

Just like any finely tuned machine, your shredder needs to be properly oiled to run at peak performance. But this simple task is often neglected, which causes unnecessary jamming and decreased performance. To prevent this, Dahle is introducing a new Shredder Performance Kit that eliminates the guesswork of "Who", "How Much", and "How Often" your shredder should be oiled.

The Performance Kit is available as an option with the purchase of a new Dahle professional shredder. It includes a 4 liter automatic oiler, four gallons of shredder oil, 100 waste bags, and professional installation.

“Adding a Performance Kit to your new Dahle shredder is the best way to maintain peak performance,” said Scott Prokop, VP, Dahle North America, Inc. “It’s the perfect option for a centralized shredder with multiple users.”

This kit is professionally installed from the factory. Just attach, fill and shred your unwanted confidential information. The core of this kit is the 4 liter automatic oiler. This oiler provides slow, continuous oil across the entire cutting mechanism. This lubrication reduces friction on the precision milled cutting cylinders and ensures optimal shredding performance. The low oil automatic shutoff will remind you when it’s time to refill the oiler. All supplies included in this kit can be reordered at any time from your local Authorized Dahle Dealer.

Dahle North America, Inc. is a fully integrated manufacturer and distributor of business machines and office products with a brand name recognized for quality and precision. Dahle markets more than 300 products, including paper shredders, paper cutters and trimmers, scissors, letter folders, and pencil sharpeners, for the office, home, and art markets.
